

Customer Sales Analysis Report

Week 5 Project — Pandas Data Manipulation

Executive Summary

Total Revenue	\$12,365,048
Customers on File	500
Customers with Purchase Activity	100
Average Order Value	\$123,650
Top Customer	CUST016 (\$373,932)
Overall Retention Rate	89.4%

Dashboard

Top 10 Customers

Customer ID	Total Spend
CUST016	\$373,932
CUST007	\$363,870
CUST083	\$350,888
CUST073	\$349,510
CUST020	\$333,992
CUST084	\$324,144
CUST070	\$318,762
CUST005	\$318,680
CUST065	\$312,564
CUST028	\$304,465

Revenue by Region

Region	Revenue
North	\$3,983,635
South	\$3,737,852
East	\$2,519,639
West	\$2,123,922

Churn Rate by Contract Type

Contract	Churn Rate
One year	4.3%
Two year	6.9%
Month-to-month	20.6%

Key Findings

- North is the strongest region by revenue at \$3,983,635, suggesting demand and marketing spend aren't evenly matched across regions.
- Laptop is the top revenue driver at \$3,889,210, well ahead of the other product lines.
- Month-to-month customers churn at roughly 20.6%, versus 4.3% for one year contracts — contract length is clearly tied to retention.
- A meaningful share of customers only ever bought one product category, pointing to an untapped cross-sell opportunity.

Recommendations

- Incentivize month-to-month customers to move to annual contracts (discount or loyalty perk) given the large churn gap between contract types.
- Double down on North with targeted campaigns while investigating why other regions lag — could be coverage, pricing, or awareness.
- Bundle Laptop with complementary accessories to lift cross-sell rates among single-category buyers.
- Set up a lightweight CLV tracking view so the top-spend customer list can be monitored monthly instead of recomputed ad hoc.
